

## **Energy from Waste Tour**

### **The UK's largest single grate EfW facility**

The Parish Council have arranged a 2 hour tour, including Q&A, to Greatmoor.

The EfW facility was completed in June 2016 and treats up to 300,000 tonnes of residual (non-recyclable) waste, diverting it from landfill and generating 22MW of electricity in the process.

Waste arriving at the EfW comes from High Heavens Transfer Station and Aylesbury Vale District and other Local Authorities.

The new site access road was completed in 2014, diverting all waste deliveries away from the local village of Calvert Green.

#### **Tour Dates**

If you would like to find out more then please join one of the 2 tours the Parish Council have organised on either 7th August at 10am or 4th July at 5.30

There is a maximum group size of 15 and so if you are interested then please email [northmarston@gmail.com](mailto:northmarston@gmail.com) to book a place.

If you are unable to make these dates an open day is currently being organising on Saturday 1st July – there will be 3 tours (places available by pre-booking only) during the day. Please contact [jez.elkin@fccenvironment.co.uk](mailto:jez.elkin@fccenvironment.co.uk)

Rachel Callander  
Parish Clerk
