

# North Marston Community Speedwatch Group (NMSWG): Sentinel Recording September 2017: Recorded at Granborough Road, Portway and Quanton Road

## Results

- 47 vehicles were recorded exceeding the 30mph speed limit.
- 44 vehicles were recorded at 36mph or greater. Registration numbers are sent to Thames Valley Police: TVP issue warning letters to vehicle owners.
- The maximum speed recorded was 51mph. That vehicle would have required an estimated stopping distance of over 53 meters or 175 feet.
- 2 vehicles had expired MOTs, from <https://vehicleenquiry.service.gov.uk/>

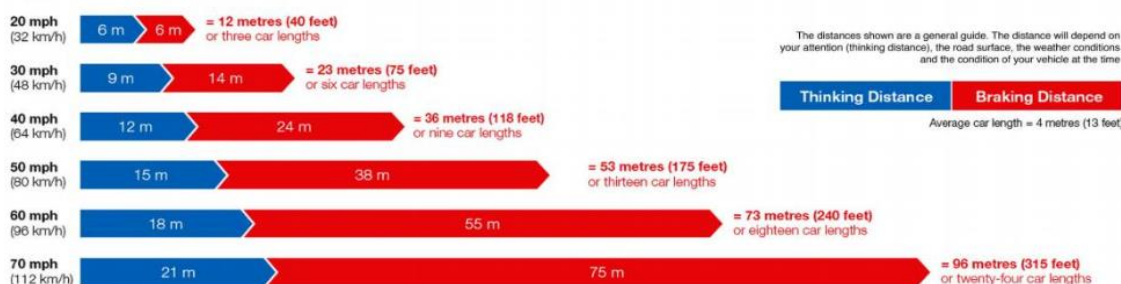

Speeding increases the risks of damage to property, and injury and death to you and your friends, relatives and pets when they are out and about.

Work out below whether you could stop or hit a person or hazard you see 100 feet/30 meters ahead

## Stopping distances

Stopping distances include the distance travelled while the driver notices a hazard and applies the brakes (thinking distance), and while the vehicle comes to a full stop from its initial speed (braking distance). The government's official estimates of stopping distances for cars are shown below. [7]

### Typical Stopping Distances
