

North Marston Community Speedwatch Group (NMCSWG): MVAS Report September 2018: Recorded at Portway 6th – 30th September 2018

The MVAS (Moveable Vehicle Activated Sign) device is pole-mounted at variable points in the village. MVAS logs data on vehicles' speed, date and time coming into the village and flashes up a speed limit reminder to violators moving faster than 30mph, the legal speed limit in North Marston.

Results

- 21344 vehicle passes were recorded over 25 days, coming into North Marston via Portway
- 43% of vehicles were recorded as travelling at speeds greater than the speed limit of 30mph
- The fastest recorded vehicle was travelling at 65-70 mph and 11 vehicles recorded over 50mph

Vehicle Speeds: Portway 06th to 30th September 2018

mph	Number of vehicle passes	%	% of total
Speed 0 to 5	0	0%	
Speed 5 to 10	169	1%	
Speed 10 to 15	505	2%	
Speed 15 to 20	731	3%

Speed 25 to 30	8708	41%	57%
Speed 30 to 35	6437	30%	43%
Speed 35 to 40	2169	10%	13%
Speed 40 to 45	553	3%	3%
Speed 45 to 50	97	0%	0.5%
Speed 50 to 55	9	0%	
Speed 55 to 60	1	0%	
Speed 60 to 65	0	0%	
Speed 65 to 70	1	0%	

This simple trick prevents the police from ever giving you a speeding ticket again From <http://www.storiesofthemoment.com/this-simple-trick-prevents-the-police-from-ever-giving-you-a-speeding-ticket-again>

Every year hundreds get caught in police speed controls for driving too fast — with a great many caught by automatic speed cameras.

But did you know there's a way to avoid the hefty fines that come along with speeding?

Online site, finddetbilligt.dk, has come up with a trick that means you never have to worry about getting caught speeding again!

It is absolutely brilliant. Best of all, the method works internationally, in every country in the world.

Here's how to cleverly avoid speeding fines

1. Look closely at the signs on the road that show you the speed limit.
2. The number indicated is the maximum speed you can travel. Whether you're on foot, bike or car.
3. Try to locate your car's speedometer. You normally find it somewhere in front of the driver's seat, on the dashboard. It has an arrow pointing to the number that reflects the car's speed. On newer cars, the speed is sometimes displayed digitally, with numbers.
4. This last point is also the hardest. Adjust your speed according to the number shown on the road sign. The police can not fine you if you do not drive over this number.

Strangely, there seem to be surprisingly too few who are aware of this simple yet genius trick. And best of all, if you stick to it, you'll never have to pay a speeding fine ever again. Even better — the road will become much safer for everyone!
